## Summary Table of Bank Structure and Conditions — Fourth Quarter 2019

### Source:
Unless otherwise noted, all data are from Federal Financial Institutions Examination Council (FFIEC) Call Reports.

### Notes:
The data are adjusted for mergers. Quarterly percentage changes are compound annualized rates except where noted. Ratios are aggregates; that is, the numerators and denominators are summed across all banks in the group, then divided.

**Large U.S. banks** are defined as banking organizations such as bank holding companies that are ranked in the top 100 in banking assets as of December 31, 2018, including assets of only their commercial bank subsidiaries. Large banks typically operate in multiple regions. The number of large banks may exceed 100 if during the calendar year some banking organizations’ assets grow larger than those of the 100th largest bank at the beginning of the year.

A **banking organization** is an independent bank or all the banks within a highest-level bank holding company; however, banks less than five years old and special-purpose banks, such as credit card banks, are excluded.

**Small tristate banks** are defined as those based in the tristate area that were not in the top 100 in assets as of December 31, 2018.

The **tristate area** consists of Pennsylvania, New Jersey, and Delaware.

**Small U.S. banks** are defined as those based outside the tristate area that were not in the top 100 in assets as of December 31, 2018, including assets of only their commercial bank subsidiaries.

**U.S.** excludes tristate banks.

The sample includes 123 small tristate banks, 4,042 small U.S. banks, and 102 large U.S. banks.

*Data for Large Banks were adjusted due to an internal merger at one institution during the second quarter in which credit card loans previously held at a nonbanking subsidiary were brought onto the bank’s balance sheet, thus making assets, loans, and consumer loans appear to grow at an extremely and artificially high rate.
